

**With more than 230 clients and 1000 studies, Oncodesign has proven to be the partner of choice in developing Therapeutic Antibodies in Oncology**

### **UNRIVALLED PLATFORM WITH UNIQUE TUMOR-BEARING ANIMAL MODELS AND NOVEL IMAGING TECHNOLOGIES**

- \* Validated preclinical mouse and rat animal models (syngenic, xenografted, transgenic)
- \* Subcutaneous and orthotopic grafts
- \* More than 280 tumor cell lines, access to primary tumors (solid & haematological cancers)
- \* Humanized mouse models (reconstituted huPBMC mouse models)
- \* Imaging by  $\mu$ MRI and  $\mu$ PET

### **OUTSTANDING EXPERIENCE**

- \* Founded in 1995
- \* Many different experimental therapeutic antibodies and reference drugs assessed
- \* More than 50 publications & communications during last eight years

### **WIDE EXPERTISE**

- \* Target expression (cells, tissues, organs, biological fluids)
- \* Multiple *in vitro* assays (MTS, TUNEL, FACS,..) for screening or activity studies
- \* Rapid Proof of Concept (*in vitro* & *in vivo*)
- \* MOA (direct or mediated effects: CDC & ADCC)
- \* Combination studies
- \* Biodistribution using  $\mu$ PET
- \* Compound efficacy by MRI
- \* Identification of biomarkers
- \* Collaboration with a renowned Phase I/IIa center
- \* Translational research from target to patient
